COMMENTS TO AUTHORS

1-In page 3, "The reason for this may be insufficientdecreases the production of nitric oxide (NO)." was without reference. 2- Title "MECHANISMS OF INTRAHEPATIC ANGIOGENESIS IN LIVER CIRRHOSIS" may need some subdivisions: a- def. of angiogenesis 2- types of inducer of angiogenesis c- mechanism of angiogenesis d- mediators of angiogenesis...then discuss each one 3- Some simple figures may illustrate the idea for readers in understanding this very important review.

COMMENTS TO AUTHORS

This is a well thought of concept to write a review. However suggest that the title of the article needs some thought and the first paragraph starting with NOT does not sound good and language is not clear. Can you give some illustrative diagram to make it simpler for the normal reader. Core tip needs to be better written as the message is not clear.
