COMMENTS TO AUTHORS

The submitted manuscript entitled, 'Sofosbuvir and hepatitis C virus infection' by Nakamura et al. presents a comprehensive review on the current knowledge and advancement on the treatment efficacy of sofosbuvir against known genotypes of HCV. The manuscript is however, not well structured with fragmented information that could interrupt the flow and interest of a reader. Also, there is a lack of language and grammatical finishing, including selection of subtitles that misfit the subject discussed. The suggested modifications in the text are highlighted (track change).
