### COMMENTS TO AUTHORS

This paper mainly restated the results of reference 17 (J Hepatol. 2015; 62:64-71). It should be given more solid results from other associated reference.

### COMMENTS TO AUTHORS

I enjoyed reading this editorial. Although, I think this manuscript has been well-organized, it may be somewhat difficult for general readers to understand the complex inflammasome networks. Probably, a few schematic diagrams of these networks will help readers comprehend.
