COMMENTS TO AUTHORS

This is a review article on New Advances in Hepatocellular Carcinoma. My comments are: (1) This is not a systematic review. This review contains a lot of personal views and biases of the authors. (2) The review is very long. This review article is more like a book chapter than a review article. (3) The article has many typographical and grammatical mistakes. Occasionally non-English terms appeared in the article, e.g. metanalisis, yuxtahiliar, hipoxia-induced, Ooccasionally. (4) There is no need to include the figures into this review. (5) The references (Bibliografia) is not in a single format, e.g. (a) reference 1 has 3 authors followed by et al., reference 9 has 6 authors followed by et al; (b) reference 4, pages 745-750, reference 155, pages 311-22, in many other references the last page was not given; (c) reference 125 is a duplication of reference 109.

COMMENTS TO AUTHORS

1. This is a comprehensive review of the new advances in HCC. The comments is positive except for minor language problems. 2. The tables was not standardized. 3. The figures didn't have arrows to point the lesions. The figure legends should meet the requirements. 4. Some of the references didn't meet the required formats. 5. Any acknowledgment? Such as funding support.

COMMENTS TO AUTHORS

This is an excellent review paper on HCC. There are many errors of English which must be changed.
