COMMENTS TO AUTHORS

Manuscript #02939921 Authors report in this paper the detection rate of colonoscopy for cancer and adenoma in an Iranian population. Minor comments: Title: "pathological future"...I believe it was "...features" Abstract: "All data will be extracted from a cross-sectional study and retrospectively assessed the colonoscopy database." This sentence is not clear and needs to be rephrased (same problem with the similar sentence in "study design")
