SPECIFIC COMMENTS TO AUTHORS

Thank you for the invitation to review the manuscript titled "Biliary atresia and congenital disorders of the extrahepatic bile ducts". This is a well written paper, which summaries the clinical features, radiological aspects, and pathogenesis of biliary atresia. The reference list is is okay. The figure and tables are oaky. The quality of language is acceptable. There are some suggestions for author: 1: To add pathological features of atresia in details. 2: To add few characteristics images of liver biopsy in atresia. 3: Few lines on extended Kasai procedure (reference: Ramachandran P, Safwan M, Srinivas S, Shanmugam N, Vij M, Rela M. The extended Kasai portoenterostomy for biliary atresia: A preliminary report. J Indian Assoc Pediatr Surg. 2016 Apr-Jun;21(2):66-71) 4: Also to add some literature on pediatric liver transplantation in atresia
