COMMENTS TO AUTHORS

This review article has made a thorough introduction of gastrointestinal Kaposi's sarcoma referring a case report. Because the authors stated a confirmatory immunohistochemical test for LNA 1 antigen for the patient, this result should be add to Figures. In addition, precise interpretation of pathology (Fig 4) should be added so that even non-experts would be convinced of the diagnosis. Fig 1 to 3 and even 4 can be combined to integrate into one figure. They do not need go individual.
