COMMENTS TO AUTHORS

This is a comprehensive and mostly well written paper reviewing EoE. -Introduction needs to be edited. Several sentences are not clear, such as "Despite 20 years, EoE is relatively a newly recognized disease". Please edit carefully. -Throughout the paper punctuation is placed before references .(4) I believe this is incorrect and should be as follows (4). -Please discuss literature on how many biopsies are adequate from the mid and distal esophagus, this is an important clinical question. Are 4 biopsies needed? Any data to support 2 versus 4? -Page 7 Line 2, replace "are evidence" with "is evidence" -Please expand the section on steroid use. Please discuss dosing, length of treatment, recurrence rate, outcomes. These are critical pieces of information for a clinician about one of the most common drug treatments for EoE. -Please expand on the indications for dilation, and any literature on the long term success of dilation without medical treatment.

COMMENTS TO AUTHORS

Major Comments: This is a nice review article. I would suggest adding some information on role of long-term topical steroid therapy (maintenance therapy) in EoE to make it more complete. Minor

Comments: page 11 CRTH2 typed as CHTH2 page 12 - randomize should be randomized page 13 - show"ed" significant improvement
