## COMMENTS TO AUTHORS

The authors are to be commended on an extremely well written and helpful manuscript! I look forward to seeing the manuscript in print. Two minor questions for the author: 1. Based on your study, are there any circumstance where you would recommend TPN? Infants with NEC, for example? 2. Can you say anything about different formulations of essential nutrients? Is this extremely standard, or do different suppliers produce different products? Does it matter as far as you can tell?
