COMMENTS TO AUTHORS

Nicely presented case report. I wonder why this case report has been sent to a radiology journal when its presentation, decision making, and treatment are all surgical.

COMMENTS TO AUTHORS

Dear Author, Although your paper contained errors regarding the grammar and English language, I corrected all of these. Moreover, I omitted and added some words to finally construct it to be in a ready form for publishing. Please check the corrected form carefully to know which corrected. I did so to encourage you as a start for your publishing. Hope you more success Rania Refaat, MD, My email is raniarefaat_1977@hotmail.com Lecturer in Department of Diagnostic and Interventional Radiology Ain Shams University Cairo Egypt Mobile phone: 0100 5285089

COMMENTS TO AUTHORS

This is an interesting case of mesenterial myolipoma. The following is my comment: #1. What is the recommended follow-up interval of CT following the debulking surgery ? #2. What is the preferred imaging study in such case ? CT or MRI ?
