COMMENTS TO AUTHORS

This article presented the imaging findings of adrenal tuberculosis in four patients. The cases are interesting, but the article is not well written. 1. The abstract needs to be rewritten. 2. The CT and MRI company should be given. The CT and MRI parameters should not include too much words. 3. Clinical history and symptoms should be added in this artical. 4. The MRI images' quality are poor.

COMMENTS TO AUTHORS

TO the authors, Good piece of work, well written. I have one concern, the core tip is lacking.

COMMENTS TO AUTHORS

1. It is not specified whether it is a mini-review or case series. 2. It is not mentioned if the 4 patients were asked biopsy, or only the 4th. 3. References should be written down evenly. 4. If possible, update references to 2013 and 2015.
