ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Radiology

ESPS manuscript NO: 20482

Title: Advances in determining abdominal aortic aneurysm size and growth: The evolution from ultrasound to 2-Dimensional and to 3-Dimensional CT indices and the concept of regional growth measurements

Reviewer's code: 00710670

Reviewer's country: United States

Science editor: Xue-Mei Gong

Date sent for review: 2015-06-07 16:25

Date reviewed: 2015-07-18 05:22

COMMENTS TO AUTHORS

The manuscript is well written and elegantly illustrated. The topic is clinically relevant and thus a review summarizing the literature is a welcome addition to the scientific community. A couple of specific comments: - The results are comprehensively described, but the manuscript is rather long. Consider editorial trimming to highlight the salient points presented. - Measurements are sometimes presented in cm and others in mm. For easy of understanding, consider using the same units throughout.

COMMENTS TO AUTHORS

It is a paper about aortic aneurysms. Please, review English language - minor corrections. I would include a paragraph about surgical indication of aortic aneurysms at ascending, descending and abdominal aorta.
