COMMENTS TO AUTHORS

This manuscript provides a review on Computer Graphical User Interfaces in radiation therapy.

Minor Comments: "Author contributions: All authors equally contributed to this paper with conception and design of the study, literature review and analysis, drafting and critical revision and editing, and final approval of the final version." – As there is only one author, this statement should be adapted accordingly. For those not so familiar with this specific topic, a "List of Abbreviations" at the beginning of the article would be helpful. Page 29, section "SWIMRT", first sentence: "...a prostate patient with [...] prostate cancer..." -> "...a patient with [...] prostate cancer...". The reference list does not contain PMIDs/DOIs.

COMMENTS TO AUTHORS

It is very specified. So I guess if authors want more understanding they should explain more details.

COMMENTS TO AUTHORS

In this manuscript, the authors introduced five computer graphical user interfaces that were self-developed into the radiation therapy. These tools are believed to improve the relevant procedures and facilitate the fulfillment of clinical tasks. The authors stated that this is a review article. However, the manuscript has been organized according to the format of a scientific article. Please modify the format accordingly.
