## COMMENTS TO AUTHORS

In page 7, author mentioned that "All 15 patients had a triple phase contrast-enhanced CT of abdomen 2-3 days post procedure". IS CT scan 2-3 days after BRTO a routine protocol in authors' institute? More detailed description of gelfoam slurry is needed. The amount of gelfoam used ranged from 3 to 15 packs. But, I can not know the amount of gelfoam in 1 pack.

## COMMENTS TO AUTHORS

The authors reported their own experiences in combining CBCT with BRTO in the treatment of bleeding GV. Although the sample size is small (15 patients), the content of this study is interesting, and it was well-written.
