SPECIFIC COMMENTS TO AUTHORS

This is an excellent systematic review about the endoplasmic reticulum stress in cardiovascular complications. This manuscript is nicely structured and well written. I have no question about this manuscript.

SPECIFIC COMMENTS TO AUTHORS

The authors present a review of endoplasmic reticulum stress and its relationships with cardiovascular diseases. They introduce us to an argument that could have important clinical implications in the future. I have no comments as the article is interesting, well written and covers a topic not much discussed in the literature.
