SPECIFIC COMMENTS TO AUTHORS

1. Introduction: This is a retrospective study, no hypothesis. 2. Statistical analysis : chi square test should be used to compare the complications of PICC and CVCs. 3. The statistical chart needs to be revised, the results need to be clearly described. 4. Grammatical errors need to be corrected. 5. The format of references should conform to the guidelines of the journal. Format is considered as a measure of how carefully work is done.
