Dear author, This is a review paper with a focus on the role of the gut microbiota in cardiovascular diseases. The article is written with the good English-speaking adduction of the arguments. The article is sufficiently novel and very interesting to warrant publication. All the key elements are presented and described clearly. The most discussable options in the article are: 1) Would you please kindly harmonize your paper correcting all your typos and grammar errors - I would recommend you something simple like a free-of-charge Grammarly. 2) Table 1 is not comprehensive enough. There are a few studies including genetic one which reveal far more microorganisms that might be of importance. Please elaborate it.
