SPECIFIC COMMENTS TO AUTHORS

The authors of the manuscript reviewed the literature to assess the incidence of cardiac arrhythmias during cardiac catheterization, and their impact on outcomes and potential approaches to minimize this risk. This is an interesting manuscript because assesses a topic that has not raised a lot of interest in the literature, little explored. I have no mayor comments. The results are well presented. Page 4: Please, rewrite as this sentence is difficult to understand. "The majority of studies regarding RHC related arrhythmias are in of of these settings, especially in ICU or OR"...
