### **SPECIFIC COMMENTS TO AUTHORS**

Firstly, thank you for opportunity to review very interested article. I don't feel qualified to judge about the English language and style due to not native language. 1. The title reflect the main subject about COVID-19 vaccine-associated myocarditis, title was clear and easy to understand. 2. The abstract summarize and reflect the work described in the manuscript. 3. The key words reflect the focus of the manuscript. 4. The manuscript adequately describe the background, present status, and significance of the study. 5. The manuscript describe methods in adequate detail. 6. The research objectives achieved by the experiments used in this study. 7. The manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly, and logically. 8. Tables and figures sufficient, good quality and appropriately illustrative of the paper contents. 9. The manuscript cite appropriately the latest, important and authoritative references in the introduction and discussion sections.

#### **SPECIFIC COMMENTS TO AUTHORS**

The present manuscript is a good overview of published data towards COVID-19 vaccine-associated myocarditis. Well-structured, clearly written, hits all the main topics needed. My only possible revision would be regarding the “Evaluation and Management of COVID-19 Vaccine Associated Myocarditis” section. Since it seems the authors have aimed to focus on the practical points in this section, I would recommend the addition of a clinical decision-making algorithm on the diagnostic and management of COVID-19 vaccine-associated myocarditis that could significantly increase the practical sound of the paper and increase the priority of publication.
