#### **SPECIFIC COMMENTS TO AUTHORS**

1. It's better to add more detailed instruction on the therapy. 2. The results of ECG should be presented if performed. 3. A figure of the case may be more attractive to beginners and professionals than only texts.

#### **SPECIFIC COMMENTS TO AUTHORS**

Dear Authors; Thanks for reporting the manuscript entitled (Intra-atrial course of right coronary artery: Case report and systematic review of the literature): Case report and systematic review of the literature)-Manuscript NO: 78661. My comments; Congratulations for reporting your case 1. The case is well described, but needs minor revisions 2. Pay attention this is systemic review, all tables and figures should be given clearly with details and captions. 3. Linguistically your manuscript needs polishing, for example: (In none of the cases was presence of significant coronary artery stenoses or mild atherosclerotic plaques indicated)?. I hope you would amend the article as per journal guidelines to be published. Regards,
