<input checked="" type="checkbox"/> Grade A (Excellent)	<input checked="" type="checkbox"/> Grade A: Priority Publishing	Google Search:	<input type="checkbox"/> Accept
<input type="checkbox"/> Grade B (Very good)	<input type="checkbox"/> Grade B: minor language polishing	<input type="checkbox"/> Existed	<input type="checkbox"/> High priority for publication
<input type="checkbox"/> Grade C (Good)	<input type="checkbox"/> Grade C: a great deal of language polishing	<input type="checkbox"/> No records	<input type="checkbox"/> Rejection
<input type="checkbox"/> Grade D (Fair)	<input type="checkbox"/> Grade D: rejected	<input type="checkbox"/> Existed	<input checked="" type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

COMMENTS TO AUTHORS

The authors provide a rather interesting commentary to the paper of Voight et al. It would be for the benefits of the readers, if the authors could include section Conclusion, and state major points of the relationship between HDL-C and CVD risk.

COMMENTS TO AUTHORS

The topic is of interest for WJC readers. Based on data by the recent article of Voight et al, the present comment reports innovative and interesting point of view, with appropriate discussion of available evidence. For these reasons it is worth for publishing.
