COMMENTS TO AUTHORS

General Comments: This is a carefully prepared rather comprehensive review summarizing the data available on relationships between a vitamin D deficiency and hypertension. Specific recommendations: Pg. 5, 2nd paragraph line 1: "Although the effects of vitamin D on blood pressure are known since decades,..." should be revised to read something like: "Although the effects of vitamin D on blood pressure have been known for several decades,..." Pg. 10, Top paragraph, 3 lines from the bottom: there is a circle degree symbol on the number 25 that needs to be corrected or clarified.
