**COMMENTS TO AUTHORS**

This manuscript is a good review about coronary thrombus in the context of STEMI.

The manuscript is well written and I have only few comments.

I suggest to adjust the sections about treatments to focus more on the topics related to coronary thrombus management. An alternative is to give data related specifically to thrombus treatment with each therapy.

Reasons why European guidelines recommend UFH in Class I for PPCI over enoxaparin (Class IIb indication) should be given related to others studies and analysis available.
