COMMENTS TO AUTHORS

This is a comprehensive review of the role of obesity in vascular inflammation and coronary artery disease. In my view it is perhaps too long and tough to read. Please try to shorten paragraphs and add few graphs and figures to improve readability. Another interesting topic that could be worthwhile being addressed in this review is the concept of the obesity paradox. Please add a paragraph on it. Minor issues: Page 18: correct "exhamined" in paragraph 3. Page 26: please correct "terapie" in paragraph 3. Check references 166, 167 and 168. In the text on page 26, last paragraph, they do not appear or appear in wrong position.
