## COMMENTS TO AUTHORS

The manuscript, entitled “trans-catheter therapies for resistant hypertension: clinical review”, systemically summarized the progress of reduction of blood pressure via the renal adventitial denervation. The review is both novel and important in clinical practice. To increase the readership, please reconstruct the contents of the manuscript such as introduction, sympathetic theory of resistant hypertension, renal artery stenosis as secondary cause of resistant hypertension, diagnosis and management of resistant hypertension, trans-catheter therapy of atherosclerotic stenosis, including indications and contraindications, the surgical approach to sympathetic denervation of resistant hypertension, including indications and contradictions, discussion, including a caparison of trans-catheter and surgical approaches.
