COMMENTS TO AUTHORS

I would recommend some minor revisions. In the chapter "Nitric oxide generation without NO-synthase a table of alternative NO-generating systems would be very helpful. In the chapter "Regenerative capacity of dietary nitrate..." the authors should clarify how dietary supplementation has been achieved.

COMMENTS TO AUTHORS

Dear authors: In general, the paper is well written. Only few words were spelled wrongly, ie on page 9, cardiac "remodeling". In addition, the word count in text was 2265 where the paper may be appropriate to fit for the category of mini-review in wjc.

COMMENTS TO AUTHORS

Nice scholarly article regarding regenerative capacity of dietary nitrate on vascular system. I hope it will get lots of citations and will be helpful to scientific community. With regards
