COMMENTS TO AUTHORS

The manuscript by McCrln et al. aim to update the knowledge regarding adrenal G-protein coupled receptor kinase 2(GRK2) in the development of heart failure (HF). This review manuscript was well-written. The reviewer only has some minor suggestions as listed below. 1. It will be better that If authors could provide a graphic abstract in manuscript. 2. β arrestin should be β arrestin. Please revise them throughout the manuscript. 3. There were some inconsistency in References; for example, "-" or "_" between page number. Is dio number required for the references?

COMMENTS TO AUTHORS

This is an excellent review about the effects of adrenal GRK2 and β arrestin1. The authors have suggested that inhibition of adrenal GRK2 and/or β arrestin1 might be effective for heart failure by reducing the neurohormonal burden. This manuscript is nicely structured and very well written. I have no question about this manuscript.
