COMMENTS TO AUTHORS

The manuscript "to VAD or not to VAD" describes as a review the actually status of LVAD therapy in heart failure. It gives a well written and comprehensive overview. The only criticism is the length of the article with need some shortening regarding right ventricle failure. Secondly the paragraph "quality of life" deals only in one sentence with this aspect. Here QoL aspects are needed.

COMMENTS TO AUTHORS

Cerier E et al present a paper about usefulness for earlier implantation of LVADs through increased survival and quality of life, avoidance of multi-organ deterioration and chronic low cardiac output in patients with terminal therapie refracter Heartfailure. This article is very gut written and interesting for the reader. Therefore , it should be published.

COMMENTS TO AUTHORS

It is a good and well-written review about the LVAD implantation.
