COMMENTS TO AUTHORS

The authors present here the protocol of a study about cardiorespiratory fitness in a military population. It is well written and seems to me it will make a fine study when finished.

COMMENTS TO AUTHORS

The study is aimed to investigate the association between cardiorespiratory fitness and the hospitalization events in a large voluntary arm forces in Taiwan. The title is "Rationale and Design of the Cardiorespiratory Fitness and Hospitalization Events in Armed Forces (CHIEF) Study in Eastern Taiwan". 1. The study is a retrospective study. 2. Several factors influence the outcome of the study. Some limitations might be occurred. Please add more details of these factors. 3. Please add more details of the correlation of the cardiorespiratory fitness and the hospitalization events in the western countries. 4. The clinical application of the study is very important. Please recommend the readers "How to apply this knowledge for routine clinical practice?".
