COMMENTS TO AUTHORS

Good review on the role of radionuclide imaging for the diagnosis and clinical making process in patients with suspicion of infective endocarditis. Please comment on radiation, particularly if follow-up could be planned in a particular patient. In table 1 "moderate radiation" please specify ranges of radiation.

COMMENTS TO AUTHORS

The authors are congratulated with their effort on this review article. This is a very nice review on the diagnostic role of 18F-FDG PET/CT and WBC SPECT/CT in cardiovascular implantable electronic device and prosthetic valve infection which has a very high educational value.
