COMMENTS TO AUTHORS

Well-written article on the role of Vit D in patients with coronary artery disease, particularly on the prevention of myocardial infarction, done by researchers with recognized experience in this field I think that studies with negative results, if any, should be also reported.

COMMENTS TO AUTHORS

Overall, a well-written review of the association between vitamin D deficiency and AMI. Only one minor comment: Figure 1 seems to come from ref 12. Did authors get permission to reuse it?
