COMMENTS TO AUTHORS

Although it is an interesting paper, I want to request the authors to reconsider the following points.

1) The authors use too many abbreviations. They used abbreviated words even for common terminologies such as spermidine and supramolecular complex. Therefore, it becomes difficult when we read this manuscript because we cannot memorize such flood of abbreviated words. Please do not use too many abbreviations. Keeping original words are important for readers. 2) References are very old and give old-fashioned work for this manuscript. Please add references published after 2010 more.
