COMMENTS TO AUTHORS

I reviewed the manuscript by Franceschini and Adinolfi entitled "P2X receptors: new players in cancer pain". This manuscript is very interesting and well written. In addition it provides new information for the reader of the journal. Mohamed Hassan

COMMENTS TO AUTHORS

This is a very good and well written review. The literature coverage is thorough, the subsections appropriate and insightful. I only have two suggestions for the authors to consider: (1) You might like to consider mentioning in the Discussion the evidence that P2Y1 and P2Y2 receptors mediate proliferation and in some cancers anti-proliferation of tumour cells. (2) The legend to figure 2 does not define what the light blue, dark blue and green shading represents (only red and yellow shading is defined). Congratulations!
