

ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Biological Chemistry

ESPS manuscript NO: 28617

Title: Role of α -amino-3-hydroxy-5-methyl-4-isoxazole-propionic acid receptor receptor regulation in stress-induced pain chronification

Reviewer's code: 01299180

Reviewer's country: United States

Science editor: Shui Qiu

Date sent for review: 2016-07-14 10:03

COMMENTS TO AUTHORS

This short review is very well-written. It would be very helpful to include a diagram of some sort to illustrate the molecular events described in the text.

COMMENTS TO AUTHORS

The authors reviewed and discussed recent evidence to propose regulatory events for different RNA-binding proteins (RBPs) in the trypanosomatid protozoan parasites, and discussed how newly identified posttranslational modifications of RBPs and mRNA metabolism-related proteins could have an impact on the modulation of mRNA abundance. A minor point is that the format of the references should follow the requirement by this journal.

COMMENTS TO AUTHORS

This review is well written and well documented. I recommend its publication in the WJBC.
