The manuscript "Objective Response Rate Assessment in Oncology: Current Situation and Future" submitted by Aykan NF et al is a nice article that provides a broad review on the assessment tools for evaluation of cancer response to therapeutic approaches in oncology. However, some changes should be made in order to improve its quality. I suggest you the drawing of a table summarizing the positive and negative points of the assesment tools. Furthermore, in the Introduction section, in the part "it is serves", the word "is" should be removed: "it serves".
