SPECIFIC COMMENTS TO AUTHORS

Reviewer The manuscript is interesting. Systems biology and OMIC data integration to understand gastrointestinal cancers. However, it requires some answers to comments.

#1: In the “Pancreatic cancer” section (On page 6), “About 80% of the diagnosis is made in advanced clinical stages, leading to a 5-year prognosis of survival after surgery [30].”

What is the meaning of this statement? #2: In the part of “Genome data in gastrointestinal cancers” (On page 7), the section on the Hepatocellular carcinoma does not appear. Does this section need to be added to make the content more complete? In my opinion, with appropriate revisions and linguistic polishing, this manuscript may be suitable for publication.
