#### **SPECIFIC COMMENTS TO AUTHORS**

This is a good review, which summarizes the problems that are easy to be ignored in clinical work. In this article, I have some suggestions: 1. Can the article add relevant research on GSM caused by fulvestrant 2. BSC patients in Eastern countries are younger and more likely to have related problems. It is suggested to increase relevant studies.

#### **SPECIFIC COMMENTS TO AUTHORS**

1.The election of topic is very excellent. Genitourinary Syndrome of Menopause in Breast Cancer is often ignored by oncology doctors, especially Chinese oncology doctors. Therefore, this article can help we pay more attention on the field to help patients.

2.The content of article is very plentiful , with a relatively comprehensive description from the cause to the treatment method, which makes the readers have a deep impression .

3.We do not see the Fig in the manuscript. It is better to have some bar graphs or pie charts to describe the research of treatment method, so that readers can understand more intuitively.
