COMMENTS TO AUTHORS

Eades et al. have written a strong review that is a pleasure to read. The content covers an interesting area that is relatively new and exciting. It is well written and informative. It needs no corrections that I can find. I recommend publication.

COMMENTS TO AUTHORS

This is a well written article and addresses an important and timely topic concerning stem cells and epigenetic regulation by long non-coding RNAs in stem cells and cancer. Overall the article was a pleasure to read and was informative on a broad range of issues. However, the authors might want to consider the following point. Some readers might find it useful to have a diagram summarizing the different forms of lncRNAs etc and the important roles these molecules play in cancer and the current state of art known mechanisms.
