COMMENTS TO AUTHORS

An excellent review but a prolific author with extensive experience with prostate cancer. This is clearly a timely and clinically relevant review. I would only question that reference 33 does not seem to relate to a randomized controlled trial suggested in the last paragraph of clinical experience. Presumably the trial is ongoing? Perhaps it would be better to reference the Clinicaltrials.gov identifier if the study is ongoing. Again, congratulations to the author on a thorough and informative review of a state-of-the-art technique.
