COMMENTS TO AUTHORS

The article reviewed the current background and dynamic role of myofibroblast in oral lesion either wound healing or tumor. Although researches in the area of myofibroblast in each section such as oral wound healing and tumor are not huge, they summarized the most important researches in each section. The figures also show good connection and collaboration between each other. There are some grammar and space issues in the article but it should be easy to fix, such as on page 4 "denovo" should be "de novo" etc.

COMMENTS TO AUTHORS

The manuscript is well written and of interest and pertinent reviewing the dynamic role of MFs in oral lesions. The issue is needed to be well understood, hence, this review would add some benefit to better understand the role of MFs in oral tumours.
