COMMENTS TO AUTHORS

Good paper dealing with hypercalcemia due to the extopic PTH secretion. This is the first description of such phenomena, which can have important clinical impact.

COMMENTS TO AUTHORS

Presentation of case and discussion is exhausting. I offer they abbreviate the case characteristics in a table. Authors can also present the related literature in a separate table for better comparison and early understanding of the evidence.

COMMENTS TO AUTHORS

Dear authors, I read with much interest your case report with title: "Gallbladder adenocarcinoma and paraneoplastic parathyroid hormone mediated hypercalcemia". It is a very well written case report pointing out all necessary details of the management of the patient. It may be considered a bit lengthy but I think the additional details given make it more educating for the junior medical public of the journal. Make sure that you present the references according to the style of the journal and correct the format of the reference list. Congratulations,
