## COMMENTS TO AUTHORS

Review manuscript submitted for publication in World Journal of Clinical Oncology, ESPS Manuscript NO: 30834 Manuscript title: Transarterial chemoperfusion (TACP) for the treatment of liver metastases of breast cancer and colorectal cancer: clinical results in highly palliative patients The overall structure of the manuscript is complete. The scientific question proposed in the manuscript were the results achieved with intraarterial hepatic chemotherapy in 36 patients suffering from unresectable and therapy-resistant advanced and hepatically metastasized CRC and BC.tumor response, survival and at which time the maximum therapy effect can be seen. The manuscript would be interesting enough to warrant readers' attention The manuscript provides adequate details of methods to allow a reader to repeat the research. The source of the data is presented is reliable. . There is importance of the paper and the significance of the contents; Presentation and readability of the manuscript is good Conclusions of the manuscript are clearly presented The manuscript cite all important, relevant and timely
