#### **SPECIFIC COMMENTS TO AUTHORS**

1. In the final diagnosis, I think you should include "anti-interferon-gamma autoantibody (nAIGA)-induced adult-onset immunodeficiency" as one of the diagnoses.
2. Why this patient have anti-interferon-gamma autoantibody (nAIGA)-induced adult-onset immunodeficiency?

#### **SPECIFIC COMMENTS TO AUTHORS**

The relationship between "adult-onset immunodeficiency", "anti-interferon (IFN)- $\gamma$  autoantibodies" and "nontuberculosis Mycobacterium" should be explained better. In almost half of the introduction, the aim of this study was tried to be explained. I think the introduction should be more informative.
