#### **SPECIFIC COMMENTS TO AUTHORS**

Dear editor, Thanks for the opportunity to review the manuscript titled “Developing an Enhanced Recovery after Surgery Program (ERAS) for oncology patients who undergo hip or knee reconstruction surgery: A review”. I think it is an important work and I congratulate authors for their efforts. I have just small suggestions. 1. Medical Subject Headings (MeSH) terms are used to index article in MEDLINE/PubMed. Choosing the keywords according to MeSH would be a better choice for authors. 2. There are Double spaces between some words, please check. 3. Can authors collect their suggestions in a table and present them to the reader. this will interest the reader and will be easy to understand. 4. If it does not disturb the flow of the article text, can the authors discuss about their clinical experience? Thank you
