## **SPECIFIC COMMENTS TO AUTHORS**

This article mainly describes the Telemedicine in assessment of various orthopedic pathologies through systematic virtual assessment. The article is meaningful and made summary for telemedicine diagnosis of orthopedic department, which is worth readers' attention. However, the contents of this article mainly expatiate on orthopedic examination and diagnosis, and there are few introductions about COVID-19. Therefore, I suggest that the author delete COVID-19 in the key words, and re-describe it in the abstract and conclusion. The word "COVID-19" can be replaced with "epidemic diseases".
