

## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Orthopedics*

**Manuscript NO:** 71648

**Title:** Epidemiology and incidence of paediatric orthopaedic trauma workload during the COVID-19 pandemic— A multicenter cohort study of 3171 patients

**Provenance and peer review:** Invited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 05873452

**Position:** Peer Reviewer

**Academic degree:** MMed

**Professional title:** Associate Chief Physician, Doctor

**Reviewer's Country/Territory:** China

**Author's Country/Territory:** Denmark

**Manuscript submission date:** 2021-09-16

**Reviewer chosen by:** Jin-Lei Wang

**Reviewer accepted review:** 2021-11-27 08:32

**Reviewer performed review:** 2021-11-27 09:43

**Review time:** 1 Hour

#### **SPECIFIC COMMENTS TO AUTHORS**

This is a practical retrospective multicenter cohort study. At a time when medical resources are relatively scarce, a resource re-allocation to help serve the COVID-19 patients might be possible without reducing the level of care for injury-related paediatric patients. However, in my opinion, is it possible to provide some medical advices that the guardian needs to pay attention to to reduce the occurrence of injury?
