SPECIFIC COMMENTS TO AUTHORS

Dear authors: Thank you for carrying out this research work. The following will give you several options to improve your manuscript: - For reviews, a systematic review registration must be carried out in PROSPERO, just like a clinical trial. Please proceed with the registration and reflect this in the manuscript. . You should make clear the inclusion and exclusion criteria for articles in this review. You should also assess the reliability of the selected articles using some kind of scale (PEDro or similar...). - The introduction to your manuscript is very sparse and there are hardly any references. In addition, you should include current data. - The results section should include a table in which the articles studied by variables, sample, results and conclusion are shared, so it would be more graphic. Please improve these sections, best regards.
