## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Orthopedics*

**Manuscript NO:** 87711

**Title:** Time of Surgery and Surgeon Level in Supracondylar Humerus Fractures in Pediatric Patients: A Retrospective Study

**Provenance and peer review:** Unsolicited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 05681938

**Position:** Peer Reviewer

**Academic degree:** MD, PhD

**Professional title:** Doctor

**Reviewer's Country/Territory:** China

**Author's Country/Territory:** Saudi Arabia

**Manuscript submission date:** 2023-08-23

**Reviewer chosen by:** AI Technique

**Reviewer accepted review:** 2023-08-31 04:46

**Reviewer performed review:** 2023-09-01 09:00

**Review time:** 1 Day and 4 Hours

Scientific quality	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Very good <input type="checkbox"/> Grade C: Good <input checked="" type="checkbox"/> Grade D: Fair <input type="checkbox"/> Grade E: Do not publish
Novelty of this manuscript	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Good <input checked="" type="checkbox"/> Grade C: Fair <input type="checkbox"/> Grade D: No novelty
Creativity or innovation of this manuscript	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Good <input checked="" type="checkbox"/> Grade C: Fair <input type="checkbox"/> Grade D: No creativity or innovation

<b>Scientific significance of the conclusion in this manuscript</b>	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Good <input checked="" type="checkbox"/> Grade C: Fair <input type="checkbox"/> Grade D: No scientific significance
<b>Language quality</b>	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
<b>Conclusion</b>	<input type="checkbox"/> Accept (High priority) <input type="checkbox"/> Accept (General priority) <input type="checkbox"/> Minor revision <input checked="" type="checkbox"/> Major revision <input type="checkbox"/> Rejection
<b>Re-review</b>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<b>Peer-reviewer statements</b>	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous
	Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

## SPECIFIC COMMENTS TO AUTHORS

-111 Authors reported the recovery of ulnar nerve palsy. How about the radial and medial nerves, which are also commonly affected in displaced SCF cases? -113, -119: Did the authors record the time of pulse recovery after the operation? What were the indications for open detection in cases where pulses were absent after manual reduction? -126: The risk of ulnar nerve injury is rare under lateral parallel K-wire fixation. How can we ensure that this case was a surgical complication? Does it depend on the absence of preoperative signs of nerve injury? -133: I am curious about the high incidence of complications among cases undergoing ORPP. Could the authors provide concise information on these complications? -Table 2 The type of SCFs where extension or flexion has a significant effect on the management and subsequent outcomes. I hope authors include this point in their study.
