### COMMENTS TO AUTHORS

Several reviews have been published on this topic. Nevertheless, considering the setting in which the paper is directed could represent a useful contribution. I think that the English can be ameliorated. Revision of some references is necessary: No 21,43,45,60,63: to modify Rheumato in Rheumatology No 64: to modify Rev Bras Reumato in Rev Bras Reumatol No 65: to replace Reumatol Clin 2011;7:179-188 with Ann Rheum Dis 2012;71:319-326.

## COMMENTS TO AUTHORS

This is an interesting and informative review article regarding the epidemiology, diagnosis and treatment of psoriatic arthritis. The literature search performed was detailed and the presentation of the article was clear. I think the article could be improved by adding a few color figures showing the clinical and/or radiological features of psoriatic arthritis.
