COMMENTS TO AUTHORS

This is a very interesting study describing long term complications after SCI. It is a well written manuscript that covers missing parts of the existing literature. I strongly recommend its publication in the WJO.

COMMENTS TO AUTHORS

The authors review chronic complication of spinal cord injury. Spinal cord injury is significant clinical challenge. Its management in chronic phase is important as well as acute phase. This reviewer has comments that the authors may take into consideration. The authors summarized classification of pressure ulcers in Table 1; however this reviewer believes that Table summarized chronic complication of spinal cord injury should offer significant information for the readers of The Journal. Unfortunately, there are several grammatical and typing errors.
